

"Universal" Pump

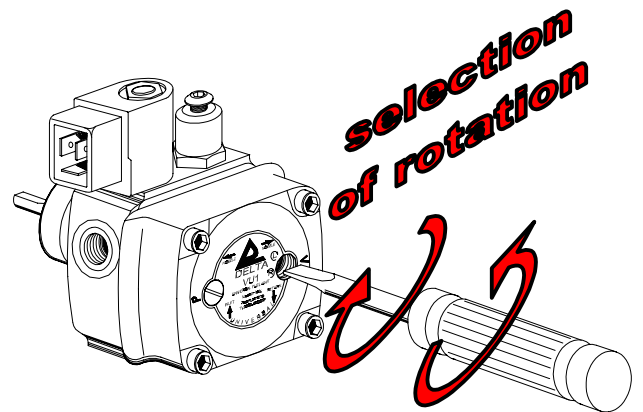

Model VU1

Patent pending TV2000U000022

4 pumps in 1 and more!

The Delta VU1 Universal pump is the only pump that permits the transformation from clockwise to counter-clockwise and vice versa of the shaft with only the aid of a screwdriver and without removing even the cover!

With the new Delta VU1 Universal pump it is now possible to substitute the pumps with shaft rotation clockwise and counter-clockwise, with delivery port on the right or on the left and one or two pipes system with only one unit, without difficulty and without special tools, the new pressure regulation gives a large pressure range without the necessity to change the spring.

With these characteristics the pump Delta VU1 Universal is compatible for the replacement of a variety of models of various brands. We list the principal models of Delta:

SERIE VM	SERIE VD With external solenoid valve
VM1RR1-4	VD1RR1-4
VM1RR2-4	VD1RR2-4
VM1RR1-5 (fino a 18 bar)	VD1RR1-5 (fino a 18 bar)
VM1RR2-5 (fino a 18 bar)	VD1RR2-5 (fino a 18 bar)
VM1RL1-4	VD1RL1-4
VM1RL2-4	VD1RL2-4
VM1RL1-5 (fino a 18 bar)	VD1RL1-5 (fino a 18 bar)
VM1RL2-5 (fino a 18 bar)	VD1RL2-5 (fino a 18 bar)
VM1LR1-4	VD1LR1-4
VM1LR2-4	VD1LR2-4
VM1LR1-5 (fino a 18 bar)	VD1LR1-5 (fino a 18 bar)
VM1LR2-5 (fino a 18 bar)	VD1LR2-5 (fino a 18 bar)
