APPENDIX TO EU TYPE EXAMINATION CERTIFICATE (GAR)

Manufacturer:

Elettromeccanica Delta S.p.A.

Trademark:

Elektrogas

Scope:

The linear control valves LMV are intended for use on gas burners, gas appliances and similar use.

List of available models:

LMV : Linear control valves approved on EN 13611

Specifications:

Mechanical strength group: 2

Ambient temperature : -20°C to +60°C

Gas type : I, II, III family EN 437

Available types:

LMV2 ¾" threaded
LMV3 1" threaded
LMV35 1"¼ threaded
LMV4 1"½ threaded
LMV6 2" threaded
LMV7T 2"½ threaded
LMV4F 1"½ flanged
LMV6F 2" flanged
LMV7 2"½ flanged
LMV8 3" flanged

Special conditions:

Reduction of gas orifice, identified with **1** or **2** in the type code

Adjustable bypass, identified with **M** in the type code

Version for chemically aggressive gases (e.g. biogas) identified with **J** in the type code

Version for small gases (e.g. hydrogen) identified with **HF** in the type code

Version with NPT threads / ANSI flanges identified with **N** or **Y** in the type code

Connection for actuator: compact joint identified with **C**, joint with lever identified with **L**, joint with lever for remote actuator identified with **R** in the type code
