

MATERIALS
for
atomisers, atomiser parts and burnerlances

00-0101-0G-E

COMPANY CERTIFICATE

11-03-98

Materials

Definition

The following certificate is only valid for burnerlances, atomisers and atomiser parts which originate from our company and which are specially developed for the use in oilburners.

Certificate

We hereby declare that all used materials and parts are suitable for the use with fluids Heizöl EL, Heizöl M and Heizöl S with fluid temperatures up to 140°C and for fluid pressures up to 40 Bar.

Mechanical load

Definition

The following certificate is only valid for atomising systems that are equipped with an integrated shut-off needle and which consist of burnerlances, atomisers and atomiser parts which originate from our company and are specially developed for the use in oilburners.

Certificate

We hereby declare that all parts which are involved in the transfer of force for the shut-off mechanism are tested at our company with a mechanical load which is comparable to 5 times the maximum possible spring load.
